

Joshua Daly

Architectural Design Student
University of Missouri
B.S. 2023-2027

Statement

I design to create connections. Connections to landscapes, to shared memories, and to those who inhabit a space. My work is shaped with a respect for craft, material honesty, the natural environment, and responsible, intentional building. Each project is an experiment on how material, place, and experience can come together to create spaces that feel meaningful and real.
